

# Keeping computer stuff easy, convenient, and safe

Grant Rettke

March 27, 2014

# Outline

## Audience & format,

- ▶ Adult computer users who've got stuff that they like
- ▶ Informal, interactive, adaptable
- ▶ 100% information sharing and discussion

# Raison d'être

- ▶ What would we do if everything we owned on our computer or phone were lost?
- ▶ What would we do if everything we looked at on our computer or phone were made public for everyone to see?
- ▶ It is really "all about you"

# The good news

- ▶ 15m options
- ▶ Tiny little changes
- ▶ Excellent options

# Stuff lost

- ▶ Not fun (inconvenient)
- ▶ Time waster (sorted photos)
- ▶ Money waster (music, movies)

# Stuff found

- ▶ 7200RPM ESATA
- ▶ Internet backup
- ▶ Backup versus versioning

# Stuff valued

- ▶ Identity, money, decisions
- ▶ Normal life
- ▶ Abnormal life (travel, medical events)

# Stuff protected

- ▶ HTTPS
- ▶ Encryption
- ▶ Keychain

# Stuff that is private

- ▶ Religion and politics
- ▶ Employer and family
- ▶ Government and society

# Stuff kept private

- ▶ Anonymity
- ▶ Freedom

# How to do it

- ▶ Discuss, determine, and identify values
- ▶ Decide how much time to spend
- ▶ Define a plan

# When to do it

- ▶ Plan for the worst
- ▶ Expect the best
- ▶ Don't take things too seriously
